Five Principles for Good Documentation - YouTube <https://www.youtube.com/watch?v=H0GKczmzYzI>

Figure 1: youtube

Five principles

1. relevant
2. timeless
3. tested
4. centralised, accessible
5. collaborative

Sections

- overview
- domain
- architecture
 - example of hpc architecture i.e. building blocks
 - <https://neysa.ai/blog/hpc-architecture/>
 - <https://hpc101.readthedocs.io/en/latest/tutorial/session1/arch.htm>
- getting started
- code conventions

- rules, design patterns, naming
 - why are they so
 - not the things you can automate with linter and pre-commit
- key dependencies (if needed)
- faq / troubleshooting
 - build as faq's become clear not by thinking what would be a potential faq

Five common problems

1. hard to understand
2. incomplete or non existent
3. out of date
4. overly specific
5. solving the wrong problem
